

Eleanor Meriwether

UX Design Manager | Lead UX Designer

(636) 577-9539 • eleanor@delux.com • www.emeriwether.com • www.linkedin.com/in/emeriwether

EXPERIENCE

- **TensorIoT / UX Design Manager (Lead UX + Strategy)**

October 2021 – Present

1. **Transformed the discovery phase** from a sales-only step into a collaborative, UX-led process—brought in storyboards, sketching, and whiteboarding to clarify the “why” early and align teams before work began.
2. **Delivered end-to-end UX for dozens of projects** across industries such as healthcare, agtech, manufacturing, transportation, and energy—spanning PoCs to production builds, mobile to desktop, and everything in between. Often brought in when clarity was scarce and stakes were high.
3. **Transformed handoff and design delivery process. Examples include:**
 - Introduced a design sign-off process that set clear boundaries with clients and gave PMs and devs a reliable launch point—reduced last-minute design changes and helped teams build with confidence.
 - Overhauled design consistency and dev efficiency by implementing a shared design system strategy—led the adoption of AWS Cloudscape and MUI, reducing custom component use and dramatically improving front-end speed and cross-team alignment.
4. **Partnered with engineers early and often** to translate design into code without surprises—balancing usability with technical feasibility to ensure smooth delivery.
5. **Cultivated a high-growth, high-retention remote design team. Examples include:**
 - Fostered a thriving remote culture through weekly skill-sharing, creative workshops, 1:1 coaching, and team bonding tailored to individual passions.
 - Created internal resources like a design project checklist, career growth rubric, and review framework—many of which were adopted company-wide to improve onboarding, feedback, and career development.

- **TensorIoT / UX Designer**

August 2019 – October 2021

1. **Designed wireframes, flows, and high-fidelity UIs** for dozens of fast-paced projects—navigated ambiguity with speed while meeting enterprise standards for scale, usability, and polish.
2. **Streamlined UX workflows and introduced smarter tools**—pushed for the team’s switch from Adobe XD to Figma, dramatically improving collaboration, speed, and overall quality.
3. **Partnered closely with developers and PMs** to transform fuzzy ideas into scoped, buildable solutions—kept delivery smooth and surprises minimal.
4. **Elevated UX visibility across the company** by leading workshops for developers, PMs, and Sales—clarified what UX actually is, documented process, and organized resources to support better delivery.

- **Freelance UX Designer**

May 2018 – July 2019

1. Built core UX skills and client communication experience through early freelance work with small businesses.
2. Partnered directly with clients to define goals and deliver user-centered solutions on tight timelines.

Eleanor Meriwether

UX Design Manager | Lead UX Designer

SKILLS

- **Discovery & Strategy:** Turning chaos into clarity through stakeholder workshops, client interviews, and smart prioritization. Comfortable defining MVPs, mapping goals, and asking the right questions early.
- **UX Design:** From sketch to wireframe to responsive UI—end-to-end design with a focus on usability, accessibility, and making sure everything feels intentional (not just pixel-pretty).
- **Collaboration & Leadership:** Team leadership, collaborative decision-making, and designing solutions where user value, business impact, and tech feasibility all get a seat at the table.
- **Tech-Speak Fluency:** Conversational in cloud architecture (AWS), APIs, and dev workflows—able to talk shop with engineers and translate between worlds without a Rosetta Stone.

TOOLS

- **Figma:** Primary tool and fan-level enthusiasm.
- **ChatGPT:** Daily driver for faster thinking, clearer communication, and smarter design workflows.
- **Previously used:** Adobe CC (especially XD), Sketch, Axure.
- **Low-tech legends:** Stickies, pencil and paper, whiteboards—still undefeated for rapid problem-solving.
- **Tool-agnostic and outcome-focused:** If it works, I'm in.

EDUCATION

- **University of California, Irvine**
March 2018
Bachelor of Science, Informatics
Emphasis: Human-Computer Interaction
- **University of Missouri, Columbia**
May 2013
Bachelor of Arts, Anthropology
Bachelor of Arts, International Studies

VOLUNTEER EXPERIENCE

- **World Information Architecture Day Los Angeles** / Volunteer & Communications Director
Built and led a team of 24+ volunteers for a 300+ person event
- **Orange County UX Meetup** / Speed Networking Host
Organized and hosted monthly events for the local design community
- **Orange County UX Sketch Bootcamp** / Assistant Instructor
Guided students during hands-on design workshops
